The screenshot displays the IBM Watson IoT Platform interface. The top navigation bar includes 'Browse', 'Action', 'Device Types', and 'Interfaces'. A sidebar on the left contains icons for various functions. The main content area is titled 'Recent Events' and shows a table of live data streams. The table has four columns: 'Event', 'Value', 'Format', and 'Last Received'. The data shows five 'status' events with JSON values containing temperature and humidity data, all received 'a few seconds ago'.

status	{"temperature":96,"humidity":37,"pre...	json	a few seconds ago
